PROFESSIONAL SUMMARY

Frontend-focused software developer with 6+ years of experience building high-performance, accessible applications in React, TypeScript, and Next.js. Backed by hands-on AWS experience (Lambda, API Gateway, DynamoDB, CloudFormation) and a track record of owning features end-to-end, from component architecture through deployment, on enterprise-scale production systems. Uses AI-assisted development to accelerate delivery and improve code quality.

KEY ATTRIBUTES

- End-to-End Ownership & Execution
- Scalable Enterprise System Design & Architecture
- AI-Accelerated Development
- Cross-Functional Collaboration & Delivery

TECHNICAL SKILLS

Frontend: React, TypeScript, Next.js, Angular, React Native, HTML/CSS/SASS

Cloud & Infrastructure: AWS (Lambda, API Gateway, DynamoDB, CloudFormation, EC2, S3, CodePipeline), Azure, Docker, CI/CD (TeamCity)

Testing: Jest (unit), Playwright (end-to-end)

Backend: Node.js, C#, ASP.NET Core, REST APIs

Databases: SQL Server, Oracle SQL

Tools: Git, Postman, JMeter, Expo

PROFESSIONAL EXPERIENCE

Wawanesa Insurance

2022 - 2026

Application Developer II

- Developed and maintained React components for enterprise web applications, ensuring accessibility compliance and scalability
- Led technical execution by translating complex business requirements into component architecture and task breakdowns that improved sprint predictability and reduced spillover
- Drove discovery and requirements gathering during vendor evaluation for a session analytics tool, then implemented it across core applications to debug user-reported defects and trace issues found in application logs
- Delivered frontend accessibility improvements to meet WCAG compliance requirements across core applications
- Integrated AI-assisted development workflows to streamline feature implementation and debugging, reducing delivery cycles and improving overall code quality under aggressive timelines
- Collaborated with developers, testers, and business stakeholders to deliver high-quality features while mentoring junior developers and improving team effectiveness
- Obtained Guidewire certifications and applied platform expertise to develop and maintain reliable, business-critical insurance systems

Online Business Systems

2019 - 2022

Software Developer

- Developed full-stack features for an AngularJS enterprise application, improving system reliability and optimizing core business workflows
- Developed mobile applications using React Native and Expo, successfully managing the full lifecycle from initial build to production to meet critical client-specific delivery timelines
- Integrated Azure AD B2C for enterprise-level authentication across multiple platforms, strengthening application security protocols and ensuring seamless, secure access for end users
- Led technical research and provided accurate work estimations during sprint planning, collaborating with stakeholders to resolve production issues and improving overall project predictability

Fido

2016 - 2019

Sales Representative

- Exceeded sales targets by ~200% through consultative problem-solving and customer-focused solutions
- Acted as Manager on Duty, supporting team operations and resolving escalated issues
- Trained and supported team members, contributing to overall store performance

EDUCATION / CERTIFICATIONS

Red River College | ***Business Information Technology***

University of Winnipeg | ***Psychology and Neuropsychology***

Guidewire | **Certified Associate - InsuranceSuite Developer**

Guidewire | **Certified Specialist - EnterpriseEngage Configuration**
